

Field Extender™ 2019E

for Sage 300 2019

Add Unlimited Optional Fields and Electronic Document Attachments to Any Sage 300 Transaction!

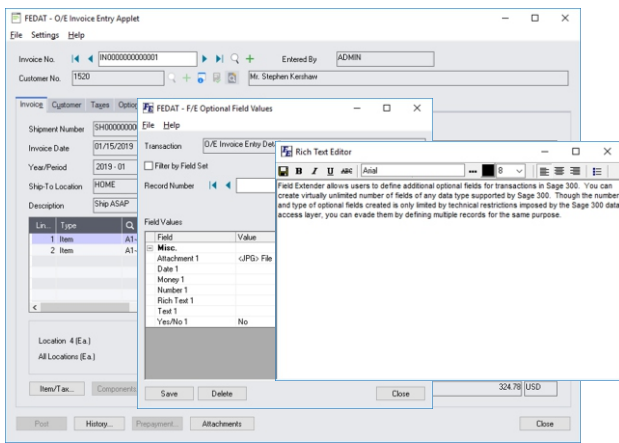

Field Extender™ 2019E is an SDK application for the creation and maintenance of unlimited optional fields and electronic documents. Optional fields created by Field Extender are attached to Sage 300 transactions at Batch, Entry and Detail Line levels. Optional fields can be entered using customized VB macros or a generic Optional Fields Entry screen. Field Extender is an excellent tool for creating advanced reports, implementing customized Sage 300 solutions and managing electronic documents. Any number of fields can be dynamically defined as "Electronic Attachment", "Date", "Numeric", "Boolean", "String" and many more types. Add images and specification sheets to "I/C Items", extending parameters for inventory items; or a dozen fields to "O/E Order/Invoice Entry" to capture order processing, shipping, forwarding and other sales related information; or add departments, regions, sales and product related fields to "G/L Journal Entry" at detail line level. Validate optional field values against existing Sage 300 tables, in addition to user defined validation tables. Your imagination is the limit!

Field Extender 2019E is available in Pro and Lite editions. The Pro edition has the full functionality of Field Extender, while the Lite edition serves as a platform for the new SYSTRONICS product, Document Attachment Applets, and is distributed at no cost.

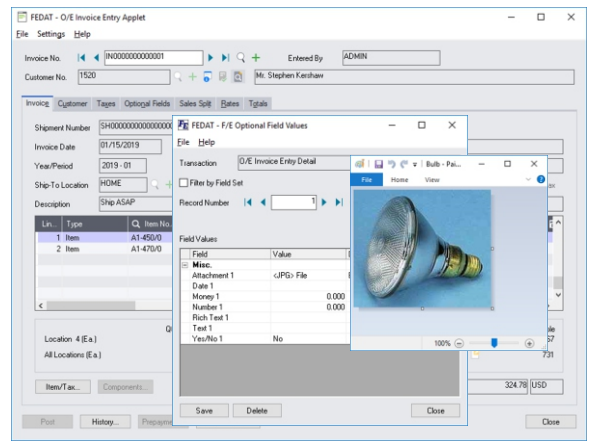

Invoice Uniquifier	Line Uniquifier	Line Type	Item	Miscellaneous C...	Description	Item Account Set	User-Spe

With Any Sage 300 Transaction*

Rich Text Editor Available for Optional Fields

Attach Files of ANY Format to Sage 300 Transactions

Functional Features

- Supports Electronic Document Attachments.
- Supports Multiple FE Records per Sage 300 Record.
- Supports dynamic creation of "Date", "Numeric" and "String" fields. Other field types that can be used are the following: Binary, Boolean, Time, Integer, Long, Money, Real.
- Supports grouping of fields per Sage 300 UI.
- Supports Default Field Values.
- Supports Validation Against Sage 300 Tables.
- Supports Read Only Fields.
- Supports Hidden Fields.
- Supports Rich Text Fields with Import/Export functionality.
- Field Extender™ is launched through custom Sage 300 User Interfaces or the Optional Fields Entry UI.

Highlights

- Supports Sage 300 Verify Database.
- Supports multiple company databases.
- Supports all databases supported by Sage 300.
- Supports DBDUMP & DBLOAD.
- Supports multi-lingual user interfaces.

Compatibility

- Sage 300 version 2019.

Business Benefits Gained as a Result of Implementing Field

Extender:

- Adds Electronic Document Management to Sage 300.
- Adds Optional Fields anywhere in Sage 300.
- Extends reporting capabilities.
- Adds fields on batch, entry, and detail line levels.
- Increases flexibility of data types.
- Supports 3rd Party SDK applications.
- Reduced Ongoing Costs with Easy Installation, Configuration & Support.

Technical Details

- Field Extender is a Sage 300 SDK application.
- Required Sage 300 modules: S/M.

About SYSTRONICS

SYSTRONICS is a Sage Software Development Partner and a Microsoft Gold Certified Partner, in business since 1977. SYSTRONICS has forged partnerships with Sage Software and Microsoft for over twenty years.
